Jim Gordon - February 3, 1983

Mother: Still sees a very strong affinity for her on other side - doesn't think she's going to die anytime soon but must have had a very strong bond with Auntie Virginia, who just died.

Bahamas: I asked about Atlantis being there and possible energies there that might be stronger than other places on earth. He said to ask around once we are there and see where they are investigating - you can see buildings and roadways through the water off the coast. He's not sure where, but ask if they are in the vicinity that we will be in. He says the earth has twelve chakras and that one of them is located in this vicinity - it may be the emotional one. The earth has a soul just as we do. I asked him how I could find out more about the 12 chakras of the earth and he said he would write it up and send it to John.

Abortion: He says that this is very controversial. The soul does not take embodiment until the first breath. Before that it is attached emotionally only. If you have an abortion, you are responsible to that soul. He has seen it happen many times where the soul reappears as another family member. Karmically you are going to have to work it out either in this life or in another. You have to deal with it.

Schubert: Poet-minstral during time of Francis I where we all came in contact. Lawyer in England in 1700s with my husband. At that time we were very good friends and that bond of friendship continues.

Me: After Civil War, before now. WWI - Englishman living in France at the beginning. Died in the war about 1917. Flashes of light probably scare

me because that's how I died - in an explosion.

I told him how much fun this was and that whole new worlds were opening up to me - that I had reread The Prophet and cried, etc. etc . He said that another book to reread is Johnathon Livingston Seagull. I told him that all these things were in my house and he said that I had already been searching. He had told John about how much was about to open up for me.

I asked about him - told him of our lunch with Cleora - told him that if it was personal not to discuss it. When he was five he realized that he saw things that other people didn't see. He saw the death of one of his mother's closest friends and told her about it in the morning. That night the call came confirming it. His mother said that people didn't know those things and that frightened him and he began to shut these things out. When he decided to start again they told him to write in green ink that he would remember these things. I asked if he was a master? He said that we are all masters of some planes and that he was of some. He has done a lot of astral travelling - attended universities on other planes and learned some things.
